## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1-21 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: The allowability of the claims resides in part that the closest prior art of record **Bode et al. (US 6,535,774)** does not disclose, alone or in combination, the steps of:

Regarding independent claim 1, **acquiring data for a perturbation model for a number, N, of control parameters, N being at least 1, by performing a minimum of N condition profile measurements, wherein each profile results from perturbing one or more of the control parameters until each of the control parameters has been perturbed; and constructing the perturbation model by aligning and synchronizing the temperature profile data so that the data share the same time scale to allow representing the perturbation model as  $T(x,y,t)$ , in combination with the other elements and features of the claimed invention.**

Regarding independent claims 15 and 18, **acquiring data for a perturbation model for a number, N, of control parameters, N being at least 1, by performing a minimum of N temperature profile measurements, wherein each temperature profile results from perturbing one or more of the control parameters until each of the control parameters has been perturbed; constructing the perturbation model by aligning and synchronizing the temperature profile data so that the data share the same time scale to allow representing the perturbation model as  $T(x,y,t)$ , in combination with the other elements and features of the claimed invention.**

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
